ZACHARY CRAMTON

520.330.6034 | zachary@cramton.com | linkedin.com/in/zcramton | zachary.cramton.com

Builds tools that help people take part in the projects that shape their communities. Past work includes teaching first-time mechanics to repair their own bikes, piloting a community mosquito habitat reporting platform, and compiling student feedback into formal comment letters for a transit corridor design. Directed $1.5M+ in matching funds toward $7M+ in successful grant awards for multimodal transportation infrastructure. Works with geospatial data production and analysis in ArcGIS Pro, R, and Python, supported by a B.S. in Ecosystem Science and Sustainability from Colorado State University.

CORE COMPETENCIES

- Programming: R, Spatial R Packages, Python, ArcPy, SQL, VBA, Git, web design with Quarto
- Software: ArcGIS (Pro, Online, StoryMaps), QGIS, OpenLCA, Adobe Illustrator, AutoCAD, Fusion360
- Certifications: Remote Pilot Certificate (FAA Part 107), IS-100/200.c (ICS 100/200), IS-700.b (NIMS)
- Member: American Planning Association, Geospatial Professional Network, Society for Conservation GIS

EDUCATION

B.S. Ecosystem Science and Sustainability, Colorado State University, Fort Collins, CO | GPA: 3.83 | May 2026

EXPERIENCE

GIS Technician, CACI Inc. (Contract) Sep 2026 – Present

- Collect and attribute geospatial features from satellite imagery in ArcGIS Pro, using custom tools for data management and cross-referencing multiple sources to verify each feature and its attributes.
- Run quality control on digitized data with custom scripts and GAIT.

Volunteer Photographer, City of Fort Collins Natural Areas Feb 2026 – Present

- Photograph public events, restoration work, and programs for the City's outreach and public communication.

Teaching Bike Mechanic, CSU Central Receiving – The Spoke Jan 2025 – Aug 2026

- Taught customers with no technical background to maintain their own bikes, hands-on in the shop and at the counter, in a student fee-funded shop where labor is free for anyone who stays to learn.
- Answered technical questions at the counter and by phone as part of daily customer service.
- Led development of a knowledge database that standardized staff access to SOPs and institutional knowledge.
- Built and maintained a bike rental database in Excel/VBA as a stopgap during the shop's migration to a third-party app.
- Wrote an e-bike battery storage and charging fire safety policy in compliance with CSU EHS requirements.
- Made operational calls independently while training new hires and directing shift priorities.

Project Manager, ESS Senior Capstone (CSU) Jan 2026 – May 2026

- Managed the eight-member team piloting a migration of NASA GLOBE Observer's Mosquito Habitat Mapper to CitSci, to back up and expand community mosquito habitat reporting in Fort Collins.
- Organized the team into technical, data collection, and data visualization sub-groups.
- Reset project scope with stakeholder Dr. Caroline Nickerson (NASA GLOBE and CitSci) once the team found the original goal unrealistic for the timeline, team skills, and existing infrastructure.
- Delivered a feasibility report, a prototype CitSci project, and an ArcGIS StoryMap analyzing mosquito habitat and West Nile risk in Fort Collins.

- Sourced, managed, and integrated the StoryMap's data and edited it alongside the teammate who served as primary author.

CSU Student Representative, West Elizabeth ETC Design Project Aug 2023 – May 2026

- Represented students in the first design of a multimodal bus rapid transit corridor, from 30% through 90% design.
- Reviewed streetscape cross-section designs with consultants and city staff from multiple departments.
- Advocated for raised bike lanes and a roundabout at a key intersection.
- Compiled student and advisory board feedback into formal comment letters to the design team.

Financial Officer, CSU Alternative Transportation Fee Advisory Board Aug 2022 – May 2026
Previously Chair (2024–2025), Vice Chair (2023–2024), and College of Engineering Representative (2022–2023)

- Chaired the 22-member interdisciplinary board, setting meeting agendas and program priorities.
- Allocated $500,000 in annual student fees to active transportation.
- Presented budget allocations and contract terms to the board for approval.
- Managed a $2.5M+ contract between CSU Student Government and Transfort, the Fort Collins bus agency, aligning student government, university administration, and Transfort around shared transportation goals.
- Directed $1.5M+ in matching funds to successful grant applications that brought in $7M+ in awards for multimodal transportation infrastructure over four years.
- Developed outreach and education programs connecting students to transportation resources, and led campus engagement through events and periodic emails to students, staff, and community members.
- Rebuilt the board's public website and reorganized its records and policy tracking to hold up across board transitions.
- Wrote the CSU micromobility program evaluation for ATFAB and CSU Transportation, published in the Association for Commuter Transportation's 2025 TDM Impact Report.

Conservatory Volunteer, CSU College of Agricultural Sciences Mar 2024 – Mar 2025

- Maintained the Conservatory, a student study space in CSU's Plant Growth Facilities, through greenhouse upkeep and routine plant care.
- Identified and labeled plants to support the space's educational mission.

Soil Lab Technician, CSU Soil Innovation Lab May 2024 – Aug 2024

- Processed field-collected soil samples for the 3M project, a study of grazing impacts on ecosystems and producer wellbeing.

Hydrogeology Lab Technician, GeoSystems Analysis, Inc. Jun 2022 – Aug 2023

- Coordinated domestic and international deployments of sensors, supplies, and personnel.
- Researched and applied regulatory requirements for lab and consulting operations, including OSHA respiratory protection and chemical hazard compliance for muriatic acid and raffinate waste.
- Refined the sensor-splicing SOP, improving efficiency by over 300%.

Operations Specialist, Rocketry Works LLC Jun 2020 – Aug 2022

- Researched fire code and HAZMAT storage requirements and prepared the facility to meet permit conditions, passing fire inspection on the first attempt.
- Supported daily HAZMAT shipments and fabrication production.
